NEO4J : FROM ZERO TO HERO !

Come and meet Peter Neubauer, creator of Neo4J Graph oriented NoSQL database, at the ENSEIRB MATMECA (Amphi A). He will make you exit the relational database matrix by presenting Neo for Java and show the specificities of a graph oriented database.

We'll start with a brief introduction to Neo4j and Graph Databases, to make this event appropriate for beginner and intermediate graphistas.

With the 1.8 milestones of Cypher, the query language has gained full data manipulation abilities. Let's get together for a lightweight workshop that introduces the various features of Cypher with a series of progressive koans.

Get your feet wet, beer and pizza is guaranteed!

Inscriptions : BORDEAUXJUG.ORG

NB : This talk will be in **english**.
